

# NEW VENTURE — ESCROW —

## CHANGING YOUR ESCROW EXPERIENCE

A customized digital signature platform that allows escrow documents to be signed electronically, saving our clients time and energy. Our goal is to provide a faster, simpler, and more straight forward escrow experience.

Our exclusive mobile app is available to all agents, buyers, and sellers which allows full transparency into your Escrow file from the touch of a button. It gives you real-time updates, instant access to documents, and contact information to all parties in the transaction.

New Venture Escrow issues an Errors and Omissions policy to the seller for every escrow closed. Sellers can receive up to \$25,000 including legal fees for any dispute that may occur 6 months from the close of escrow. Protect your seller with this proprietary policy.

Now you can create net proceeds sheets for your clients INSTANTLY, and send them via email and SMS with the push of a button! No more emails and calls back and forth, or waiting for escrow to create a net sheet for you. Instant value at your fingertips, 24/7!
